x2

All you want baby you can have  
All this time we're wasting can't get it back  
Ain't a doubt that we can make it last  
So make it sweet, Don't hold back

You got what I been missing  
So come get it  
If you got the ambition

I won't question your decision  
So come on,  
Use your intu-ition, babe

Fell asleep with you spinning round my head  
All the things that we felt but never said  
Thinking of you makes me break out in a sweat  
Do all I can to keep my heart inside my chest

You got what I been missing  
So come get it  
If you got the ambition

I won't question your decision  
So come on,  
Use your intu-ition, babe

Don't be leaving me feeling this way  
ooh ooh ooh oo ooh ooh

Over and over we keep going back and forth  
Making and breaking up but who is keeping score  
If you let me I can give you what you need  
Give me the go ahead and I will take the lead

You got what I been missing  
So come get it  
If you got the ambition

I won't question your decision  
So come on,  
Use your intu-ition, babe

*repeat next lines and fade*

Don't be leaving me feeling this way  
Use your intu-ition, babe
